SUMMARY

I am Dhruvesh Rana, a highly skilled and dedicated software developer with expertise in the MERN stack, React Native, and React.js, specializing in both web and mobile applications. Currently employed at Groovy Web Tec Ltd. in Nadiad, I bring a robust background in front-end development and a strong commitment to delivering intuitive, user-friendly applications. My experience spans crafting seamless user experiences and maintaining high standards in application performance, contributing to projects with professionalism and technical insight. With a deep understanding of React ecosystems and hands-on experience in mobile and web app development, I am driven by a passion for innovation and excellence in software development.

EXPERIENCE

Software Developer
Groovy Web Tec Ltd., Nadiad
Dates of Employment: [Month Year - Present]

- Developed and maintained web and mobile applications using the MERN stack, React.js, and React Native, focusing on responsive and optimized user interfaces.

- Collaborated closely with cross-functional teams to translate business requirements into functional applications, enhancing user experiences through clean and efficient code.

- Spearheaded front-end development initiatives for various projects, ensuring compatibility and responsiveness across devices for both web and mobile platforms.

- Leveraged advanced knowledge of React Native to build high-performing mobile applications, optimizing features for smooth performance and intuitive user experiences.

- Demonstrated expertise in state management, implementing Redux for streamlined data flow, and effectively handled API integrations to ensure seamless backend-frontend communication.

- Led efforts in troubleshooting, debugging, and performance tuning, resulting in a consistent improvement in app load times and user satisfaction.

  Actively contributed to code reviews and maintained documentation for ongoing development, fostering an environment of continuous learning and best practices within the team.

PROJECTS

Reanlo – Book-Centric Social Media Platform
Role: Junior Developer
Technologies: React Native, Redux, REST API

- Reanlo is a mobile application tailored for book enthusiasts, combining social media functionality with a passion for reading. Similar to Instagram, it enables users to share book reviews, engage in discussions, and track their reading progress. Features include a detailed book information page, discover section, notifications, and an admin panel for content management. Reanlo allows users to follow authors and readers, fostering a vibrant community around book-related content.

Business Maintenance – Billing and Customer Management Platform
Role: Sole Developer
Technologies: React, Redux, Firebase

- Business Maintenance is a web application designed to streamline business operations, including billing, customer, and dealer management. It allows users to create dynamic bills, manage customer and product data, and track transactions effectively. Key features include a View Bill section to monitor pending and cleared amounts, a dealer section for tracking incoming goods, and an intuitive interface for managing daily business tasks. This app enhances operational efficiency by securely storing all data and providing comprehensive tools for accurate financial tracking.

LANGUAGE

English , Hindi , Gujrati

EDUCATION

Master of Computer Applications (MCA)
Charotar University of Science and Technology (CHARUSAT)
Completed in 2024

Gained advanced expertise in software development, data structures, and application design, with a focus on front-end technologies and mobile application development. Developed strong problem-solving skills through hands-on projects and practical coursework.

Bachelor of Commerce (B.Com)
Dharmsinh Desai Institute of Commerce (DDIC)
Completed in 2022

Built a foundational understanding of business principles, finance, and management, enhancing analytical skills applicable to both business and technology fields.

SKILLS

Programing Language:-
JavaScript   C   Java   C++   Html   CSS

Project Management:-
Trello   JIRA
